

REMARKS

AMENDMENT TO THE CLAIMS

No new matter was introduced in the amendments to the claims.

Claims 1 and 14 were amended to provide address the Examiner's objection that it was unclear whether the second edge of each of the panels is retained along the second end of the same of another corner piece as the first long edge. Specifically, the language "adjacent said first long edge of each of said at least two panel members of each of said sides" or "adjacent said second long edge of each of said at least two panel members of each of said sides" was added to describe the corner piece into which each first and second edge, respectively, was inserted as discussed with the Examiner on September 25, 2006. Such adjacency is clear from the specification and the drawings.

Claim 1 was further amended consistent with the Examiner's statement of allowable subject matter as to Claims 2-13 to incorporate the limitations of Claim 2. Claim 2 was therefore cancelled.

Claims 3, 5, and 12, dependent on now-cancelled claim 2, were amended to be dependent on currently-amended claim 1.

Claim 22, objected to as duplicative, has been cancelled.

CONCLUSION

The issues raised by the Examiner have been fully addressed. Applicant respectfully requests the application be allowed for issuance.
